CONNECT APP**

Technical specifications

Unit Specifications

- Moisture range: 2%–38% (depending on grain tested)
- Operating temperature range: 5°C – 45°C (41°F – 113°F). Best accuracy between 16 – 32 °C.
- Moisture measurement method: Electrical high frequency dielectric (capacitive) measurement, factory calibrated using standard oven dry reference methods: ISO 712 (grains), ISO 665 (oil seeds), ISO 6540 (maize). Sampling method for grain calibration is based on ISO 950 and while handling samples we follow ISO 7700-1 and ISO 7700-2
- Bulk density measurement factory calibrated to match reference method ISO 7971-3 (for display in kg/hl)
- Sample size: 0.4 l
- Meter dimensions: 155 x 302 x 202 mm
- Weight (with hopper and batteries): 1435 g
- Weight (in sales packaging): 3 kg
- Package size: 405 x 285 x 180 mm

WILE 200

THE MOST ACCURATE AND USER-FRIENDLY GRAIN MOISTURE, TEMPERATURE AND TEST WEIGHT METER WITH PATENTED SPILL-FREE DESIGN.

Features

- Test scales/calibrations for over 20 grains, seeds and beans
- **Fast and easy to use:** display instructs user and warns of any error or potential inaccuracy
- Spill free design is clean to use
- No heavy work like grinding or compression required
- Locking grain hopper
- Patented grain leveller for leveling grain before testing
- Excellent repeatability
- Easy access USB port for future updates
- Large easy to read back-Lit LCD screen
- High frequency capacitive moisture measurement
- Automatic averaging and temperature compensation
- User adjustable moisture offset calibration, separate for each grain
- User interface in local languages
- Automatic power-off
- Long battery Life / Low battery warning
- 2 year warranty
- Compatible with Wile Connect app. ▶

Moisture Measurement Specifications

- Moisture repeatability: 0.3 %-points
- Moisture resolution: 0.1 %

Grain Temperature Measurement Specification

- Bulk density repeatability: 1.0 kg/hl
- Temperature resolution 0.1°C or 0.1°F
- Hectolitre weight resolution: 0.1 kg/hl or 0.1 lb/Bu

Package contents

- Wile 200 meter with grain feed hopper
- Hard shell carrying case with shoulder strap
- 4 pcs LR6 battery (AA 1.5 V)
- USB cable
- User's manual

Box and tester can be private labeled.
